

Accumulation Conveyor Rollers

Accumulation Rollers are used to hold or buffer products into areas such as merges, sortation or palletizers. These rollers allow goods stop and accumulate on the conveyor line without stopping the conveyor drive. The AIROLL 60.3 Diameter Accumulation Conveyor Rollers are ideally suited to convey Pallets, Containers or Cardboards.

Product Technical Data

- Application** : Pallets, Containers or Cardboards
- Features** : Bears medium and heavy loads, Durable
- Tube** : Dia 60 x 1.5 thickness Mild Steel – Zinc Plating, Stainless Steel - Polished
- Shaft Material** : Dia 15mm Mild Steel – Zinc Plating, Stainless Steel
- Bearing Type** : Deep Groove Ball Bearing permanently sealed in pressed Metal Cap Bearing Housing
- Sprocket** : 1/2" – 13 Teeth Dual Row Sprocket
1/2" – 14 Teeth Dual Row Sprocket
- Sprocket Material** : EN8 | Stainless Steel
- Shaft Installation Type** : Male Thread
- Load Bearing** : Upto 65kg
